

CURRENT TEAM MEMBERS

James Moore – President and CEO

Inventor, engineer, mathematician, author - James Moore is a Systems Design engineer with an engineering degree from the University of Waterloo. He has been recognized by all levels of government and media as one of the world's foremost experts in energy production, conservation, air quality, and climate change. His company 4ELinc. develops new energy technologies (production and conservation). He is the first person to determine the equations that generate the Prime Number Sequence, and determine the equation that proves the Collatz Conjecture.

Mr. Moore was nominated by the United Nations for the Katerva Award – the equivalent of the Nobel Prize for his work in sustainability. Each year his work on energy saves Canadians over \$5 billion per year in gasoline costs and related emissions. His current focus is on the Stingray Wind Power system that will provide clean water, clean energy and save millions of lives globally each year. His work reduces CO₂ emissions the equivalent of over 50 million fully grown trees every year.

His ground-breaking work and creation of The Great Sites is a new, unique, global social platform that provides an exceptional expression of all that is insightful, life changing, positive, and empowering for anyone, anywhere.
